Pak Brunei Investment Company Limited **Liquidity Coverage Ratio** December 31, 2018

Liquidity Coverage Ratio (LCR)

SBP implemented LCR to monitor the short-term resilience of the liquidity risk profile of Banks/DFIs by ensuring they have sufficient stock of unencumbered high-quality liquid assets (HQLA) to endure a significant stress scenario for 30 calendar days.

Since PBIC's funding requirements are met from market borrowing and PBIC does not raise money from general public, PBIC's exposure to systemic risk is limited. PBIC however maintains ample stock of liquid securities to manage its liquidty requirements.

Pak Brunei Investment Company Limited Net Stable Funding Ratio - Financial Statement Disclosure December 31, 2018

Net Stable Funding Ratio (NSFR)

Net Stable Funding Ratio "NSFR" ensures that PBIC remains adequately funded over a longer time horizon by requiring the company to fund its activities with sufficiently stable sources of funding in order to mitigate the risk of future funding stress.

The ratio is defined as the amount of Available Stable Funding (ASF), relative to the amount of Required Stable Funding (RSF). The amounts of ASF and RSF are calculated after application of prescribed hair-cut from regulator. SBP expects Banks and DFIs to meet NSFR requirement of 100% effective from December 31, 2017. PBIC's NSFR remained below 100% as of December 31, 2018.
